

# KOLARIS

solution kiosk key in main

## Modular and scalable

The **KOLARIS** terminal is available in a “standalone” version (placed on its foot) or wall-mounted; it integrates high-performance sub-assemblies such as the YUNO Kiosk 21.5” touch system in portrait mode, a receipt printing system and a payment terminal (several references are available to choose from, Worldline, Ingenico or Verifone).

This kiosk can accept cash payments thanks to its banknote reader/acceptor, as well as meal vouchers, discount coupons, etc. It can also be equipped with a card dispenser.

Combined with vertical software platforms, KOLARIS adapts to many businesses, collective catering and automatic distribution (AD): reservation and order taking, assistance with purchasing and selling, management of subscriptions and customer loyalty operations, management of all transactions and cash register operations are thus ensured.

# KOLARIS

Portrait mode screen

Reader/acceptor for banknotes, restaurant vouchers and coupons

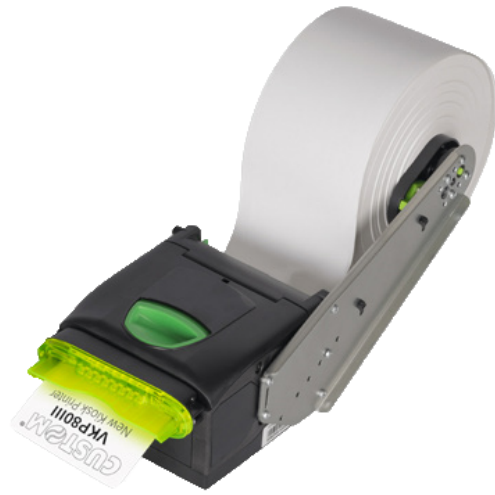

Card dispenser

Standalone payment terminal

80 mm thermal printer

2D barcode reader (optional)

Floor-mountable base (optional)
