FEATURES

High-speed, high-resolution text and graphics printing

Now you can speed customer throughput with the T-10 printer. It prints both receipts and graphics at the same high speed of up to 180mm per second. And it's the first printer in the industry to offer 16 levels of grayscale to ensure clear, crisp graphics.

Reliability you can count on

With a MCBF of 70 million lines, and an autocutter life of 2 million cuts, the T-10 delivers best-in-class reliability so critical in high volume environments.

Easy to use. Easy to maintain.

The T-10 is packed with easy-to-use features including drop-in paper loading, an autocutter, easy-to-read LEDs and an improved cover design to protect the printer from foreign objects.

More features, more flexibility

The T-10 also features auto speed adjustment for smoother printing, margin and line reduction functions to reduce paper usage and costs, and more barcode options including 2D. In addition, it comes with dual interfaces (USB and one additional interface) for flexibility in handling interface transitions.
